**LEASING SOLUTIONS**

Equipment finance for a changing world

# ANNUAL REPORT 2023

BNP PARIBAS LEASING SOLUTIONS AS

# BNP PARIBAS LEASING SOLUTIONS AS

## ANNUAL REPORT 2023

BNP Paribas Leasing Solutions AS was founded as Landkreditt Finans AS. The company's purpose is object financing – leasing and sales mortgage financing – as well as activities related to this.

BNP Paribas Leasing Solutions AS is headquartered in Ålesund, and has sales offices in Oslo, Gjøvik, Bergen and Trondheim.

All shares in the company are owned by BNP Paribas Leasing Solutions S.A. in Luxembourg. The company is contributing to realizing the owners' strategies for growth in Norway.

### PRODUCT & MARKET

The company has continued its expansion to support the growth of its clients and industrial partners by offering rental and finance solutions with services for their professional equipment sales.

In addition to the strong historical presence in the agriculture market, BNP Paribas Leasing Solutions AS has supported small and medium-size customers in industries like construction and public works, material handling, transportation and forestry. The company is also developing its business in the IT, office equipment, Software, specialized technologies and healthcare markets and energy transition.

New sales in 2023 amounted to NOK 1 513 million (purchase price of the financed assets). Of this, leasing amounts to NOK 1 490 million and loans to NOK 22 million. Compared to 2022, new sales have increased by 13%.

### RISK

The company has an internal control system covering all types of risks generated by its business activities in accordance with the three lines of defence organization and the procedures of BNP Paribas Group. The company has put in place risk metrics to monitor these risks that are regularly reviewed by the Board of Directors.

The company applies the solvency standards of Basel III as required by the Norwegian regulator and computes its capital requirements accordingly. Moreover the company assesses the adequacy of its own funds, in regard of the risks generated by its usual activities, including a forward looking capital planning (ICAAP).

At the end of 2023, the book value of leasing and loan commitments was NOK 2 849 million after reduction for write-downs caused by losses totaling NOK 25 million. All agreements are secured in the form of property rights of the asset or first priority mortgages.

To ensure that the company has sound liquidity, long-term financing agreements have been entered into with BNP Paribas Group. The company is financed by BNP Paribas S.A. Norway Branch in Oslo and BNP Paribas Leasing Solutions S.A. in Luxembourg. The borrowings are concluded with floating and fixed interest rates.

As at 31 December 2023, the liquidity coverage ratio is calculated at 113,9%. The minimum requirement is 100%.

BNP Paribas Leasing Solutions AS has only a few loans with a fixed interest rate, i.e. most of the loans and leasing contracts are based on floating interest rates. In practice, this means that within a relatively short period of time (according to current rules 4 weeks for business customers), interest rate changes can be implemented for the majority of its agreements if the market interest rate changes.

It is the Board's assessment that financial risk has been treated according to risk procedures approved by the board.

The company has subscribed an insurance program put in place by BNP Paribas Group that covers the financial consequences, as well as the criminal and civil defense costs, of claims from third parties arising from errors and omissions of board members, directors and officers while conducting their managing, representation or survey duties.

### STATEMENT OF THE ANNUAL ACCOUNTS

The book value of the portfolio at the end of 2023 was NOK 2 849 million. Total assets amounted to NOK 3 172 million. BNP Paribas Leasing Solutions AS had a profit after tax of NOK 8,15 million. At the end of the financial year, loss provisions implemented in accordance with the rules in IFRS 9 amounted to NOK 14 million (NOK -3,3 million on customers in stage 1 and 2, NOK -9,9 million on customers in stage 3 and NOK -0,8 million as write-off).

Due to the growth of the portfolio, net cash flow from operating activities amounted to NOK -85,5 million, while cash flow from investing activities amounted to NOK -1,7 million. In addition, net cash flow from financing activities amounted to NOK 160,1 million.

As at 31 December 2023, BNP Paribas Leasing Solutions AS's own funds amounted to NOK 425,8 million. The risk-weighted assets amounted to NOK 2 245,6 million.

In November 2023, the company issued a subordinated debt for an amount of NOK 65 million that is eligible as Tier 2 capital.

BNP Paribas Leasing Solutions AS was compliant with the Norwegian capital requirements with a total capital adequacy ratio of 18,96% comparing to a requirement of 17,5% as at 31 December 2023.

After the closing of the accounts, no circumstances have arisen that are of significance for the assessment of the company's position.

## ORGANIZATION, ENVIRONMENT AND GENDER EQUALITY

The company had 40 permanent employees as at 31 December 2023. Of these, 22 are women (55%). The average full time equivalent employees (FTEs) amounted to 39,09 in the financial year. In the context of work, there have been no injuries or accidents that are the cause of sick leave. It is the board's opinion that the working environment in the company is good.

At the end of the financial year, the board consisted of 5 members, of which 2 were women.

As part of BNP Paribas Group, the company fully integrates the challenge of professional equality in its HR programs, including wage equality, professional promotion, training, skills development, and other areas. It pursues its efforts to promote diversity in professional positions and representativity of women, with a view to shared governance.

The company has implemented the measures in accordance with the Norwegian Transparency Act and published a report at the end of June 2023, published at [www.leasesolutions.bnpparibas.no](http://www.leasesolutions.bnpparibas.no).

## SOCIAL AND ENVIRONMENTAL RESPONSIBILITY

At the heart of BNP Paribas Group's strategy, there is a strong desire to participate in building a more sustainable and better shared future. This willingness translates our Corporate Engagement approach, in particular by helping to achieve the 17 United Nations Sustainable Development Goals (SDGs).

At BNP Paribas Leasing Solutions AS, we share this belief and want to fully support this approach with concrete measures.

To ensure that BNP Paribas Leasing Solutions has a maximum impact and is able to serve its customers, its partners and the society as a whole, each and every employee of the company embodies and assumes this responsibility.

BNP Paribas Leasing Solutions is constantly expanding the range of equipment financed to include those that foster transition to cleaner forms of energy. The company also develops solutions and associated services for better lifecycle management of equipment. In order to support its clients in reducing waste and preserving natural resources.

For BNP Paribas Leasing Solutions, diversity and inclusion are not just a matter of responsibility, but also something that concerns collective performance. The company is truly committed, alongside its employees, to treasure and respect each person's differences, while fighting against all forms of discrimination and harassment.

BNP Paribas Leasing Solutions offers training programs to all employees allowing them to develop their skills and knowledge around sustainability and diversity as well as to volunteer with local associations during their working hours.

The company's and Group's assessments are available at [www.leasesolutions.bnpparibas.no](http://www.leasesolutions.bnpparibas.no).

## **FUTURE PROSPECTS**

In collaboration with the parent company, additional opportunities are foreseen in established markets (i.e. agriculture) and new markets including but not limited to specialized technologies, software, energy transition and healthcare.

Several digitization projects have been initiated for automation of work tasks and improvement of web portals. This will optimize both customers and vendors journeys. The company is subject to BNP Paribas guidelines regarding anti-money laundering, Financial Security, Anti-corruption, KYC and data protection.

The company is optimistic about the possibilities for further growth in the markets mentioned above and will continue to adapt its organization accordingly.

## **BOARD'S OPINION**

The board confirms that the financial statements give a true picture of its financial position and results as at 31 December 2023. We confirm that, in accordance with §3-3a of the Norwegian Accounting Act, the going concern assumption is satisfied, and this assumption has been applied in the preparation of the financial statements.

## **ALLOCATION OF THE RESULT FOR THE YEAR**

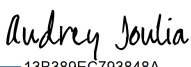

The board proposes that the profit for the year of NOK 8,15 million is transferred to other equity.

# NOTES

## NOTE 1 ACCOUNTING PRINCIPLES

### GENERAL

The financial statements of BNP Paribas Leasing Solutions AS have been prepared in accordance with IFRS® Accounting Standards as adopted for use in the European Union.

The financial statements are presented in Norwegian kroner and had no transactions in foreign currency. All amounts disclosed in the financial statements and notes have been rounded off to the nearest thousand NOK unless otherwise stated.

BNP Paribas Leasing Solutions AS was founded in October 2007 and the business consists of leasing financing and loans to customers. The business is licensed, and the company received a license from Finanstilsynet on 28 May 2008.

The financial statements have been approved by the Board of Directors on 28 March 2024 and were signed accordingly.

### ASSETS MANDATORILY AT FAIR VALUE THROUGH P&L

The category includes the company's treasury bill, as it is part of a portfolio that is managed and valued on the basis of fair value in accordance with a documented risk management or investment strategy. The portfolio is used as a buffer in LCR's reporting to Finanstilsynet to meet the liquidity requirement.

Changes in the value of financial assets determined at fair value are included in "Net income from financial instruments".

### LOANS & ADVANCES AT AMORTIZED COSTS

The category includes "Loans to and receivables from credit institutions" and "Loans to and receivables from customers".

BNP Paribas Leasing Solutions AS capitalizes loans and receivables at fair value with the addition of transaction costs. In subsequent periods, these balance sheet items are measured at amortized cost calculated using the effective interest rate.

Impairment is made in accordance with IFRS 9, which involves a three-step approach, where loans and receivables go through three categories as the credit risk changes. Loans and receivables are presented after taking into account impairment in the company's balance sheet

BNP Paribas Leasing Solutions AS considers loans and advances at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows and,
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

### FINANCE LEASE AGREEMENTS

In accordance with IFRS 16, a financial lease is defined as a lease in which substantially all the risks and rewards of ownership of an asset are transferred. Property rights can, but do not have to be transferred. Based on this definition, all the company's leases entered into are classified as financial. Such agreements are therefore entered in the balance sheet as rental financing at cost price, reduced by any advances and less annuity depreciation in accordance with the payment schedule for the individual contract.

Impairment is done in accordance with IFRS 9, which involves a three-step approach, where loans and receivables go through three categories as the credit risk changes. Rental financing contracts are presented net in the company's balance sheet.

Contracts with a guaranteed residual value (from the supplier) are depreciated to this residual value over the term of the contract.

The depreciation part (instalment) of the forward amount is entered in a separate account in the income statement, but in the annual settlement this is netted

against gross rental income. Net rental income consists of the interest portion of the forward amount.

Upon termination of leasing contracts, a gain / loss calculation is performed. This can happen both at the end of the leasing contract and at early termination during the contract period. Gains from the sale of leased assets arise when they are sold at a price that is higher than the book value. Otherwise, losses will occur. Both capital gains and losses are included as part of the rental financing income.

In accordance with IFRS 16, an estimate of future gains from the realization of the objects in the leasing portfolio has been carried out. Expected realized amounts are distributed over the lease period and are recognized as income as part of the effective interest under lease financing income in the income statement.

For tax purposes, depreciation is carried out on the leasing objects according to the balance method.

#### PROVISION FOR LOSSES MODEL

According to IFRS 9, the provision for losses must be recognized based on expected credit loss (ECL). The general model for write-downs of financial assets in IFRS 9 applies to financial assets that are measured at amortized cost or at fair value with changes in value over other income and expenses and which did not incur losses on initial recognition. In addition, loan commitments, financial guarantee contracts that are not measured at fair value through profit or loss and lease receivables are also included.

Impairment losses in accordance with IFRS 9 are described in more detail in Note 2 Risk management and internal control.

#### PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are recorded in the balance sheet at acquisition cost, including depreciation and write-off. Expenses are added to the cost of fixed assets and are depreciated in line with these.

Maintenance costs are considered as a cost directly in the year they arise. Depreciable fixed assets are depreciated on a straight-line basis over their estimated useful lives at the following rates:

Office Furniture	20 %
Office Machines	20 %
Computer Equipment (hardware)	33 %

#### LEASING – BNPPLS AS A LESSEE

A lease is a contract that conveys the user the right to control the use of an asset for a period of time in exchange for consideration. The right to use an asset is recognized on the commencement date as a right-of-use (ROU) asset and the obligation to pay lease payments is recognized as a lease liability. The ROU asset is initially measured as the present value of the lease payments plus initial direct costs and the cost of obligations to refurbish the asset less any lease incentives. The discount rate used to calculate the lease liability for each contract is the incremental borrowing rate. The lease payments are adjusted with KPI, and any subsequent measurement is expensed accordingly. Judgement has to be exercised when assessing the lease term and it considers the economic incentive to exercise an option or termination option.

Leases are related to office premises contracts mainly.

In this connection, reference is made to note 14.

#### INTANGIBLE ASSETS

Expenses for intangible assets are capitalized to the extent that the criteria for capitalization are met. This means that such expenses are capitalized when it is considered probable that the future financial benefits associated with the asset will flow to the company and the acquisition cost can be measured reliably.

Capitalized intangible assets are amortized on a straight-line basis over their expected useful lifetime (5 years). Intangible assets entered in the accounts as at 31 December 2023 apply to specially adapted software programs.

#### FINANCIAL LIABILITIES ACCOUNTED AT AMORTIZED COSTS

Financial liabilities accounted for at amortized cost are initially recognized at fair value less transaction costs and with the addition of accrued effective interest. In subsequent periods, loans are recognized at amortized cost calculated using the effective interest rate. The difference between the disbursed loan amount (less transaction costs) and the redemption value is recognized in the income statement over the term of the loan.

#### ASSESSMENT OF OTHER OBLIGATIONS

Other liabilities (for example accounts payable, tax payable and accrued expenses) are booked at nominal value and are not adjusted for interest rate adjustments.

## PROVISIONS

BNP Paribas Leasing Solutions AS provisions are recorded when the company has an obligation (legally or self-imposed) relating to a prior event, it is probable (more probable than not) that a financial settlement will take place as a result of the obligation and the actual amount can be reliably measured.

## INTEREST AND FEE INCOME

Interest income is recognized as income using the effective interest method (internal interest rate). The internal rate of return is determined by discounting contractual cash flows within the expected term. Cash flows include set-up fees and direct transaction costs.

Interest income on financial assets in stage 1 and stage 2 is calculated using the effective interest method on the gross value of the financial asset, while interest income on financial assets in stage 3 is calculated based on the amortized cost of the financial asset.

## OTHER INCOME AND EXPENSES

Other income is recognized as income in the period in which the service has been rendered. Administration and operating costs are expensed in the period in which they are incurred.

## INTEREST AND COMMISSION COSTS

Interest expenses related to liabilities measured at amortized cost are recognized in the income statement on an ongoing basis based on an effective interest method. All fees related to interest-bearing borrowing are included in the calculation of the effective interest rate and are thus amortized over the expected term. The effective interest method is a method for calculating the amortized cost of a financial liability and of allocating interest costs over the relevant period.

If lending or leasing contracts have been arranged from external parties, an agreement on commission payment has been established with some distributors. In such cases, the commission amount is expensed at the start of the contract.

## INCOME TAX

The tax expense consists of the tax payable and changes to deferred tax. Temporary differences are calculated between the carrying amount of assets and liabilities for financial reporting and the amounts used for taxation purpose. Calculation and specification of tax costs are shown in a separate note.

Temporary differences are the difference between the carrying amount of an asset or a liability and the tax value of the asset or liability. Deferred tax is determined by tax rates and rules that apply on the balance sheet date.

## CASH FLOW STATEMENT

The cash flow statement is prepared according to the indirect method. Cash and cash equivalents include cash, bank deposits and other short-term, liquid investments that can be immediately and with insignificant exchange rate risk converted into known cash amounts and with a maturity date shorter than three months from the acquisition date.

## ACCOUNTING ESTIMATES AND DISCRETIONARY EVALUATIONS

The preparation of annual financial statements in conformity with generally accepted accounting principles requires that occasionally management must make estimates and assumptions. Estimates and discretionary evaluations are regularly assessed. They are based on historic experience as well as the expectations of future events that are considered to be probable under the current circumstances.

Accounting estimates are used for: (i) the calculation of estimated consideration on sale of leased property and (ii) write-down on loans and leasing contracts. The most important assumption for estimated future gains on the sale of leases is described in note 4 and the risk management is described in note 2.

## CHANGES IN ACCOUNTING PRINCIPLES

BNP Paribas Leasing Solutions AS has implemented the amendments to IAS 1.117 regarding material disclosures of accounting principles. Beyond that, no new accounting standards have been implemented in 2023 that have had a material effect on the company's financial statements.

There are no new standards or changes to standards that have not been made applicable to the preparation of the 2023 financial statements that are expected to have a material effect on the company's accounts.

### RISK MANAGEMENT

Financial activities entail a need for management, administration and control of risk. Good risk management shall be a strategic tool for increasing value creation in BNP Paribas Leasing Solutions AS. Risk management shall contribute to ensure efficient operations, control the most significant risks to contribute to the company's goals, ensure high quality internal and external reporting and contribute to compliance with all relevant laws, regulations and internal guidelines. The company's board adopts the general principles for risk management and internal control.

The company's profitability depends, among other things, on the ability to identify, manage and price risks that arise in connection with financial services. The board of BNP Paribas Leasing Solutions AS aims to help in ensuring that the company's operations maintain a low risk profile.

The board of BNP Paribas Leasing Solutions AS determines the overall risk limits for, among other things, the following areas:

- Credit risk
- Liquidity risk
- Market risk
- Operational risk

The board is responsible for ensuring that the company has equity that is prudent based on the risk and scope of the company's activities and for ensuring that capital requirements that follow from laws and regulations are complied with. According to current rules, the tier 1 capital requirement shall be 15,5% and the total capital requirement 17,5%.

In addition to Tier 1 capital, BNP Paribas Leasing Solutions AS raised a subordinated debt that is eligible as capital instrument T2.

The board is also responsible for establishing appropriate systems and routines for risk management and internal control.

The management of the company is responsible for ensuring that all adopted routines are implemented to uncover all risk factors, and that changes in the risk exposure are identified and necessary improvement measures can be implemented.

A risk assessment is carried out annually which includes review of:

- Established control measures
- Assessment of own compliance with external and internal regulations

The result of the review is reported to the board.

Independent and effective auditing shall contribute to appropriate internal control and reliability in financial reporting. This also applies to the internal audit. The results of the audit activities are reported on an ongoing basis to the board and the operational management.

### CREDIT RISK

Credit risk is defined as the potential that a bank borrower or counterparty will fail to meet its obligations in accordance with agreed terms.

Evaluating accurately the probability of default and the expected recovery on the loan or receivable in the event of default are key components of credit quality assessment.

Credit risk is the largest risk element in the company's operations, and the loan portfolio therefore receives close follow-up and monitoring. BNP Paribas Leasing Solutions AS uses an externally developed system for assessing credit risk (based on accounts, equity, payment remarks, trends for the individual industry, etc.). All new customers are scored in connection with credit processing in this system.

Large customers are rescored at least once a year, while other customers are rescored when requesting new engagements.

For assessing credit risk levels for new customers, BNP Paribas Leasing Solutions AS has adopted the Group's methodology for measuring counterparty Risk at the time of on boarding. Every customer is rated into a specific risk class based on the external score achieved and converted into BNP Paribas Group's internal risk rating scale ranging from 1 to 10 (Strong to Weak).

The assigned ratings can be divided into the following buckets.

- Ratings 1 - 5+ = Strong
- Ratings 5 - 7+ = Good
- Ratings 7 - 8+ = Average
- Ratings 8 - 10 = Weak

In addition, ratings 11-12 are assigned to customers in default.

The board is responsible for the company's lending and has delegated authorization limits to persons involved in lending in accordance with standards from BNP Paribas Leasing Solutions Group. The authorizations are personal and are linked to competence, size of commitment and risk. Credit proposals may be decided between the Risk Management Function and the business to secure adherence to the 4 eyes principle. Business proposals that are considered significant require the involvement of Group's RISK department prior to a credit decision.

When activating new commitments, a depreciation plan is also registered for the individual financed asset. This depends on the type of asset and life expectancy and secondary market value. The depreciation plan is the basis for calculating market value during the leasing period.

As mentioned in note 1, the company has from 1 January 2018 introduced loss provisions in accordance with IFRS 9. For all exposures considered in stage 1 and stage 2 or IFRS9 classification a collective loss ratio is attributed to the portfolio.

Loan loss provisions for stage 1 and 2 are maintained according to BPLS group policies and calculated to ensure that both historical and future evolution is accounted for. Exposures in stage 1 are calculated based on a 12-month PD assessment and stage 2 (exposures subject to a significant increase in risk, SICR) on a calculation of lifetime provisions.

As the methodology describes the split between stage 1 and 2 is done based on an assessment of days past due for an exposure at the point of reporting.

Stage 1 includes all performing exposures up to 30 days with delay in payments and stage 2 are exposures that are 30 days past due and more, but not in default.

To ensure that future estimations of loan losses are taken into account the forward looking element is maintained based on an annual recalculation of the Specific Provision ratio (SPR) applied to all Stage 1 and Stage 2 exposures. This annual assessment is based on significant changes in the evolution of historical losses as well as the future expected evolution based on market trends. Subsequent to the annual assessment and recalculation of the SPR, the new SPR is applied for all Stage 1 and Stage 2 exposures for both existing portfolio and future evolution.

### **STAGE 1**

At the accounting, the company calculates a day-1 loss, corresponding to 12 months' expected credit loss. Stage 1 comprises all financial assets that do not have a significantly higher credit risk than on initial recognition. The provision for losses corresponds to All loans and receivables that have not been transferred to stage 2 or 3 are placed in this category.

### **STAGE 2**

Includes loans and receivables that have had a significant increase in credit risk since initial recognition, but where there is no objective evidence of losses. For these assets, the company sets aside for expected losses over the entire contractual life. The company has defined that a significant increase in credit risk when lending to customers occurs if payment is delayed by 30 days or more (after the end of the leasing period for the individual invoice), and / or where impaired serviceability is revealed in the group's internal risk management and classification models (e.g. customers in forbearance).

### **STAGE 3**

Consists of loans and receivables that have had a significant increase in credit risk since granting, and / or there is objective evidence of losses on the balance sheet date. Provisions are also made for these assets for expected losses over the entire life of the contract.

The company has defined a significant increase in credit risk since granting, and where there is objective evidence of loss on the balance sheet date, to occur in the event of overdrafts and arrears older than 90 days (after the end of the leasing period for the individual invoice) and the amount in arrears have breached regulatory threshold qualifying the customer as being in default.

In addition, an individual assessment is made for loss provisions on customers where there is objective evidence of loss. This can be:

- Significant financial problems with the debtor
- Default or other significant breach of contract
- It is considered probable that the debtor will enter into debt negotiations, other financial restructuring or that the debtor's estate will be taken into bankruptcy proceedings

Such individual loss provisions are booked in Stage 3.

Estimated losses in accordance with the above are entered as a provision for losses on the accounting line "Cost of Risk" in the income statement with a counter-item in own write-downs accounts in the balance sheet.

### **Determination of loss**

When any collateral has been realized and all possibilities for further recovery have been explored, the loss is defined as established.

In such cases, all receivables related to commitments are derecognized from the balance sheet and recognized as established losses on the accounting line "Losses and write-downs on loans" in the profit and loss statement. At the same time, any previous loss provisions are reversed on the commitment.

## MARKET RISK

Market risk for BNP Paribas Leasing Solutions AS is mainly related to interest rate risk.

The company has very few loans with a fixed interest rate and therefore most of the loans and leasing contracts are based on floating interest rates. In practice, this means that within a relatively short period of time (according to current rules 4 weeks for business customers), interest rate changes can be implemented on all loans if the market interest rate changes.

The company is financed with loans from group companies (BNP Paribas S.A. Norway Branch). The loan agreements with the bank are based on floating interest rates with repayment over 4-5 years. The market risk for BNP Paribas Leasing Solutions AS is therefore considered small.

## LIQUIDITY RISK

Liquidity risk is the risk that the company will not be able to honor its commitments or unwind or settle a position due to the market environment or idiosyncratic factors (i.e. specific to BNP Paribas), within a given timeframe and at a reasonable cost.

Liquidity risk reflects the risk of the Group being unable to fulfil current or future foreseen or unforeseen cash or collateral requirements, across all time horizons, from the short to the long term.

The liquidity risk is managed globally at Group and local levels under governance, steering actions, monitoring tools and mitigation strategies defined in a dedicated Group Liquidity Risk Management Policy document. This ensures that liquidity is globally managed and balanced in terms of businesses' funding needs and related liquidity risk management.

BNP Paribas Leasing Solutions AS funds its activity through intragroup funding, following the operational limits allocated to it by BNP Paribas Leasing Solutions' ALCO, monitored locally, and reported quarterly through Sub-ALCO.

## OPERATIONAL RISK

The BNP Paribas general policy regarding operational risk is to have the operating management be accountable for managing the risks generated by the activity under his/her responsibility. Risk Management, an independent control function, acts as a second line of defence, defining the global framework, challenging output from risk and control assessment, testing the risk mitigation framework and independently reporting risks to the Senior Management. This second line of defence function is made fully independent and under the hierarchical supervision of the Corporate Risk Function.

This principle presupposes that the managers identify and assess their risks, formalize and disclose them transparently, and take measures to prevent and correct any vulnerability identified in this manner. The major steps of the risk and control self-assessment (RCSA) exercise for operational risk are:

- The identification, analysis and the assessment of the inherent risks.
- The analysis of the actual functioning of the control system and of dynamic risk indicators.
- The residual risk, which provides an assessment of the risk having taken into account the actual functioning of the control framework and its results in terms of risks at a given point of time.

The RCSA (Risk Control Self-Assessment) exercise is performed on an annual basis.

The most material risks identified need then be analyzed more deeply for risk management purposes. BNP Paribas Group runs a formal process of reporting of key attention points in terms of operational risk through a bottom-up approach. This exercise is made from the RCSA outputs, analysis of actual operational incidents, results from controls & key risks indicators and output from audits assignments (internal audits, external audits, supervisory reviews, etc.). It is challenged by the independent control function ORM in charge of operational risk and permanent control framework.

## NOTE 3 INTEREST INCOMES FROM LOANS AND LEASING TO CUSTOMERS

Interests and similar incomes from loans to customers apply to interests on repayment loans. Revenues from lease payments are recorded in accordance with the annuity principle.

## NOTE 4 EARNED INCOMES ON FUTURE SALES GAIN FOR FINANCE LEASES

As described in note 1, an estimate of future sales gains from finance lease agreements is made. The estimation is made on the current leasing portfolio. It is recognized within the finance lease incomes in the income statement and as finance lease customers agreements in the balance sheet. The assessment is prepared based on historical data for the sale of a leased object at the end of its normal leasing term.

Below is the amount recognized within the income statement:

<i>in KNOK</i>	31/12/2023	31/12/2022
<b>Open Balance</b>	<b>61 975</b>	<b>56 129</b>
Flow of the year	7 067	5 847
<b>Closing Balance</b>	<b>69 042</b>	<b>61 975</b>

## NOTE 5 COMMISSIONS AND FEES INCOME

5.a. These are fees associated to the administration of customers' contracts. It includes establishment fees, reminder fees, invoicing fees and those are earned when the service is rendered and accounted for in the appropriate accounting period. The establishment fees are spread over the lifetime of the contracts.

<i>in KNOK</i>	31/12/2023	31/12/2022
Income Fee on Finance Lease	11 321	9 288
Income Fee on Loans	66	73

## REMUNERATION SCHEME IN BNP PARIBAS LEASING SOLUTIONS AS

BNP Paribas Leasing Solutions AS has established a remuneration scheme in accordance with regulations on remuneration in financial institutions, etc. As an overriding principle, BNP Paribas Leasing Solutions AS's practice of remuneration conditions must be competitive.

The variable remuneration shall be balanced against the company's risk exposure and control so that unnecessary and undesirable risk is not taken. The company's total remuneration schemes must be good, simple and predictable in order to contribute to a good performance culture. The remuneration scheme for BNP Paribas Leasing Solutions AS shall be in accordance with the company's overall goals, risk tolerance and long-term interests.

In 2023, a variable remuneration of approximately NOK 2,689 million was paid. This remuneration was accrued in 2022 and set aside in the accounts this year. The variable remuneration is distributed to all employees based on the objectives achieved. Correspondingly, variable remuneration has been set aside in the accounts for 2023 of NOK 3,30 million.

The company doesn't have a special remuneration or profit sharing scheme for the CEO or the Chairman of the board.

## NOTE 7 OTHER OPERATING EXPENSES

<i>in KNOK</i>	<b>31/12/2023</b>	<b>31/12/2022</b>

BNP Paribas Leasing Solutions AS has its own classification system for assessing credit risk for all customers (both for loans and finance leases). This takes into consideration both the customer's financial situation and the asset / mortgage's market value in relation to the book value of the commitment. The company places the entire portfolio in different buckets (scale from 1-12). An annual reclassification is done based on the customer's financial situation on exposures above a certain size. The assessments also include a separate write-down plan for the mortgage's stipulated custody value.

<i>in KNOK</i>		31/12/2023	31/12/2022
Risk Group	BNP Paribas Notation	Value	Value
Strong	Ratings 1 - 5+	737 249	626 084
Good	Ratings 5 - 7+	1 840 549	1 584 073
Average	Ratings 7 - 8+	98 665	49 024
Weak	Ratings 8 - 10	21 362	16 644
Default	Ratings 11 - 12	175 920	66 952
<b>Total gross Loans and Finance Lease</b>		<b>2 873 745</b>	<b>2 342 777</b>
Strong	Ratings 1 - 5+	26%	27%
Good	Ratings 5 - 7+	64%	68%
Average	Ratings 7 - 8+	3%	2%
Weak	Ratings 8 - 10	1%	1%
Default	Ratings 11 - 12	6%	3%
<b>Total gross Loans and Finance Lease</b>		<b>100%</b>	<b>100%</b>

Accounting default is defined as a commitment with a delay of more than 90 days, or when there is objective evidence of events that indicate a default on the part of the customer. At the end of 2023, the book value of exposures in default amounted to NOK 176 million.

## LOANS AND LEASING CONTRACTS – MOVEMENTS DURING THE YEAR:

<i>in KNOK</i>	31/12/2023	31/12/2022
<b>Loans to customers as at 01.01</b>	<b>24 247</b>	<b>65 818</b>

<b>Finance Leases to customers as at 31.12</b>	<b>2 851 812</b>	<b>2 318 531</b>

## FINANCE LEASE AGREEMENTS WHERE THE COMPANY IS THE LESSOR (IFRS 16)

As mentioned, the company leases out different types of equipment under the rules for financial leasing. The table below shows expected payments represented by capital and interest from these contracts after the end of the accounting period:

<i>in KNOK</i>	31/12/2023	31/12/2022
Less than 1 year	679 057	557 689
Between 1 and 2 years	608 202	501 821
Between 2 and 3 years	500 054	420 057
Between 3 and 4 years	398 676	315 280
Between 4 and 5 years	272 369	221 808
Over 5 years	393 454	301 874
<b>TOTAL</b>	<b>2 851 812</b>	<b>2 318 531</b>

## NOTE 10 PROVISIONS FOR LOSSES ON LOANS AND LEASING CONTRACTS TO CUSTOMERS

Impairment losses in accordance with IFRS 9 are described in note 1 Accounting principles and note 2 Risk management and internal control. As stated here, the portfolio as at 31 December 2023 is divided into sectors (industries) for estimating the loss ratio. The estimate is based on historical experience:

<i>in KNOK</i>	31/12/2023			31/12/2022		
	% Provision	Portfolio	<i>in %</i>	% Provision	Portfolio	<i>in %</i>
Agriculture	0,18%	1 080 721	38%	0,08%	960 533	41%
Contractor	0,18%	837 389	29%	0,28%	653 672	28%
Other industries	0,18%	955 635	33%	0,08%	728 572	31%
<b>Total Portfolio</b>		<b>2 873 745</b>	<b>100%</b>		<b>2 342 777</b>	<b>100%</b>

As shown in the table above, a large part of BNP Paribas Leasing Solutions AS's portfolio as at 31 December 2023 is contracts to Agriculture and forestry (38%). Customers belonging to Agriculture and forestry have historically shown a pattern for little loss. No factors have been identified that indicate increased risk and thus a need for increased provisions for this customer group. This also applies to Other industries (33%). Furthermore, approximately 29% of the portfolio consists of loans to the construction sector.

In 2023, the company has updated its provision rate with the intention to harmonize the rates across the different industries in alignment with Group practice. This is subject to follow-up and in case of significant variance, the SPR rate will be recalculated accordingly.

Following the IFRS9 regulation the portfolio is divided into Stage 1, 2 and 3. Customers with between up to 30 days in arrears are considered as Stage 1. Customers beyond 30 days and up to 90 days are considered as Stage 2. All customers above 90 days are considered as Stage 3 exposures, providing regulatory thresholds native to the IFRS9 regulation are triggered with terms to absolute and relative thresholds.

An individual assessment of customers with an increased risk of loss has also been carried out. This assessment also includes the leasing object's probable net market value and potential risk mitigators in place including personal / company guarantees. The loss provision after this assessment has been added to Stage 3.

The individual assessment where there is objective evidence of loss takes into consideration:

- Significant financial problems with the debtor
- Default or other significant breach of contract
- Granted deferral of payment or new credit for payment of instalments, agreed changes in the interest rate or in other contract terms as a result of financial problems with the debtor
- It is considered probable that the debtor will enter into debt negotiations, other financial restructuring or that the debtor's estate will be taken into bankruptcy proceedings
- Large mismatch between book value and estimated market value of the fixed asset

The tables below show the loss provision for the individual stage and how this has changed since 1 January 2023. The total loss provision as at 31 December 2023 amounts to NOK 25 million.

	Stage 1	Stage 2	Stage 3	Total
	Classification for first-time capitalization and fresh loans	Significant increase in credit risk since the first recognition in the balance sheet	Significant increase in credit risk since initial recognition and objective evidence of losses

## EXPLANATION OF THE TABLES ABOVE:

### Transfer between stages

Shows the effect of customers who have changed steps during the period. The amounts in the tables show value at the beginning of the period (i.e. 01.01.2023).

### New financial assets issued or acquired

Shows the effect of accessing new leases in the financial year.

### Financial assets deducted during the period

Shows the effect of access contracts that have been terminated during the financial year.

### Modification of contractual cash flows from financial assets that have not been derecognized

Shows the effect of contracts in the portfolio from 01.01.2023 which are still ongoing at the end of the period 31.12.2023, but where the book value has been reduced by instalment payments throughout the year. Changed balance on contracts that have changed steps in the financial year are also included (see transfer between stages).

## LOANS TO CUSTOMERS DISTRIBUTED BY CUSTOMER GROUPS AND STAGING:

YEAR 2023 <i>in KNOK</i>	Stage 1		Stage 2		Stage 3		Total

<i>Depreciation for the year in %</i>	<i>20%</i>	<i>20%</i>

## NOTE 14 LEASES (RIGHT-OF-USE)

This will apply to all leases over EUR 5,000. Maturities are ranging from 3 to 10 years. Most agreements contain an option clause to continue the lease after the expiration date. The option clause has not been considered in calculating the right to use and lease liability. The rent is usually adjusted according to the consumer price index.

<i>in KNOK</i>	31/12/2023	31/12/2022
<b>Acquisition cost at start of period</b>	<b>18 515</b>	<b>21 179</b>
Additions during the year	2 169	614
Departure of the year	-1 065	-3 278

## NOTE 21 SUBORDINATED DEBT

BNP Paribas Leasing Solutions raised a subordinated loan in November 2023 amounting to NOK 65 million and that is eligible as Tier2 Capital instrument in accordance with the relevant regulations.

The subordinated loan is made for 10 calendar years and therefore expires on 30 November 2033.

<i>in KNOK</i>	31/12/2023	31/12/2022
Subordinated debt	65 000	0
Subordinated debt accrued interests	432	0
<b>Subordinated debt as at 31.12.23</b>	<b>65 432</b>	<b>0</b>

## NOTE 22 OFF-BALANCE SHEET ITEMS

BNP Paribas Leasing Solutions granted framework agreements to customers amounting to a total of NOK 87,4 million which, as at 31 December 2023, remains unused. The company has outstanding offers/agreements that are not reflected in the balance sheet valued at 178,2 million.

The company reserves the right to reprice interest terms, in the event of a change in the underlying economic situation of the customer, or irregular market conditions in the Norwegian or international markets, or circumstances that otherwise affect the company's access to liquidity or capital.

<i>in KNOK</i>	31/12/2023
Off-balance sheet items with 20% credit conversion factor	43 707
Off-balance sheet items with 50% credit conversion factor	23 568
<b>TOTAL</b>	<b>67 275</b>

## NOTE 23 RESTRICTED BANK DEPOSITS

As requested, a bank account is dedicated to cover the tax deductions. The balance as at 31 December 2023 is NOK 1,72 million.

## NOTE 24 PENSIONS

The company has established a defined contribution pension scheme for all employees (OTP). The pension scheme meets the requirements of the Act on Mandatory Occupational Pensions. An agreement has also been entered into on the AFP scheme for all employees. Reference to note 6.

## NOTE 25 OBLIGATIONS

BNP Paribas Leasing Solutions AS has no assets that are pledged. The portfolio also does not contain any contracts where the company has guaranteed residual value.

## NOTE 26 Treasury Bill

	Investment	Risk Category	Procurement Cost	Book Value	Share Listed	Fair Value
<b>NO0013081935</b>	10 000	0%	9 589	9 589	100%	9 589

BNP Paribas Leasing Solutions AS invests in certificates that satisfy the requirements for the Liquidity Coverage Ratio. The due date is December 18, 2024.

## NOTE 27 ASSETS AND LIABILITIES MEASURED AT FAIR VALUE

The Group uses the following level division when assessing fair value :

- Level 1 : Applies to investments in government securities and units in fixed income funds with a quoted price in an active market for an identical asset or liability
- Level 2 : Applies to investments in interest rate swaps, covered bonds and own bonds where valuation is based on other observable factors, either directly (price) or indirectly (derived from price), than quoted price (level 1)
- Level 3 : Applies to investments where valuation is based on factors that are not taken from observable markets

As at 31 December 2023, BNP Paribas Leasing Solutions AS has only a treasury bill with a 0-coupon interest rate that is accounted for at fair value. The certificate expires in December 2024 and belongs to level 1 when determining fair value. There has been no transfer between levels 1 and 2 during the period.

## NOTE 28 EVENTS OCCURING AFTER THE REPORTING PERIOD

BNP Paribas Leasing Solutions AS has made a capital increase in March 2024 by issuing 100,000,000 shares which corresponds to NOK 100 million. The new share capital is then amounting to NOK 295 million.
